

# Twice the selection of our competition

## We have 200 models of polymer Li-ion batteries

Why settle for the 100 models our competitors offer, when you can have more? We give you a selection of 200 polymer Li-ion batteries. And, if quality is a concern, you'll be glad to know it's our priority too. We use production equipment from South Korea and materials from Japan, and our products are certified to be lead free.

Have an OEM/ODM idea? We'll create your samples within 15 days and deliver your first order in 28. And when you return for more batteries, we'll cut our production lead time down to 14 to 20 days. Your requests for as few as 100 units are welcome.

Our daily capacity is 20,000 units and we supply buyers in the US, South Korea and the Taiwan area. Contact us today.
