

# Don't let China be your enemy, make it your secret weapon

**Profit from globalization – with no up-front investment or financial risk**

Is China hurting your manufacturing business in labels and nameplates? With fierce global competition, it's easy to put the blame overseas – and hard to boost your profits. It's even harder to consider shifting production overseas, just as the big multinationals have. Chances are you don't have enough staff, resources, or know-how to do it.

If you want to save your business, what can you do?  
The answer is simple: **GAC**.

At GAC, we make it easy for you to turn China into an asset and compete with the big multinationals. With our help, you can do global trade – without risking your business or finances. Here's how:

## Complete financial transparency and freedom

We're not your typical trading consultant, charging high fees while you're stuck with wrong orders. **You ONLY pay us if we deliver goods you accept.**

Even better, you choose how much to pay us. Either a percentage of your selling price or of the savings you enjoy as our customer – whatever is lower. You also know exactly where your money is going – from shipping to manufacturing costs. That's because we disclose full pricing for logistics and our suppliers.

## Learn foreign trade with us

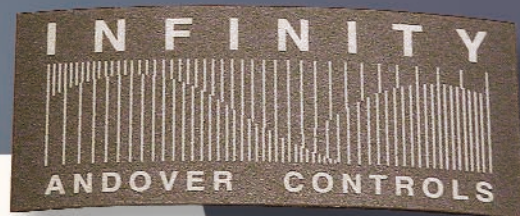

You don't just benefit from foreign trade – you learn how to do it. No more feeling overwhelmed or challenged by overseas deals.

Once you learn it, we're here to safeguard your supplier relationship. Monitoring your transactions for quality assurance and on-demand trading support are just a few of the value-added services we offer.

## Tap into world-class manufacturers in China

The US trade deficit with China is proof positive – some of the best manufacturers in the world are in China. We have them in our network of suppliers, a pre-screened group of only the most qualified partners. As our customer, you'll have access to this exclusive manufacturing network.

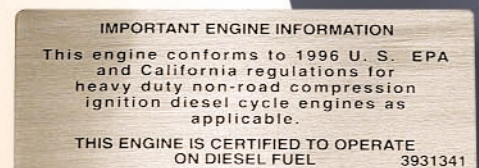

To ensure quality, we have inspectors on the ground to supervise QC according to your specifications. We also guarantee our suppliers only use 100 percent qualified materials.

0.020" polycarbonate printed in two colors in reverse, 3.5"

0.020" aluminum printed in four colors, 3"

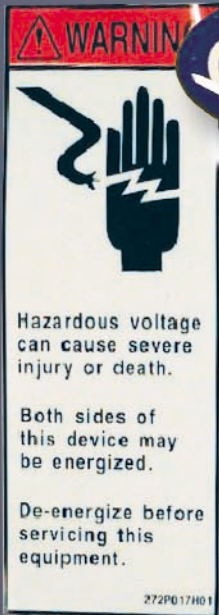

0.020" aluminum: chemically etched letters and 3M adhesive, 3"

0.020" aluminum: painted white and printed with two colors, 3.5"

0.002" white computer-imprintable polyester overlamine: with two colors, 2.3"

Polyester, 1.7"x5"

Chrome Mylar: polyurethane (non-epoxy) dome, white graphics and screened PMS 072 blue background, 2.7"

## Save up to 45 percent off domestic prices

With our supplier network in China, we can offer you incredible savings on labels and nameplates. On average, our prices are up to 45 percent lower than what you'd find in the US. That translates into higher margins for you.

Choose from a wide range of metals, from aluminum to zinc; substrates such as Mylar and PVC; production techniques including anodizing, galvanizing, and web printing; and countless other operations. We gladly welcome your custom specs – just tell us what you need.

## Legal expertise from Yale and China

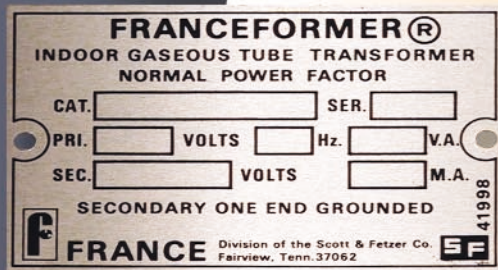

You can rest easy about legal matters. Our legal expert holds certification from Yale and a degree from China's leading law school. We help negotiate deals that work best for you and the supplier, and draft binding contracts that protect your intellectual property and trade rights.

## Consolidated shipping for savings

You enjoy savings on every shipment with GAC because we consolidate your orders. Our large and growing base of multiple buyers and suppliers makes it possible.

We work with reputable logistics providers such as Team World Wide, FedEx, and DHL to ensure your order arrives right on schedule – and sometimes even early.

Start taking advantage of globalization and recover lost business. Visit us at [www.GACltd.com](http://www.GACltd.com) or call 216-228-8550 today.
