

ON SET

Kalman and Pabst Photo Group has been around for almost two decades and is one of the premier commercial photo studios between New York and Chicago. We have an 18,000-square-foot state-of-the-art studio in Midtown Cleveland, with convenient parking right in front.

Our specialties include food, products and people. Have your shots done at our studio, or take us anywhere from coast to coast to photograph people or special projects.

STUDIO

Hundreds of backdrops and props, from French doors and wooden barn facades to teddy bears and school lockers. Two fully loaded kitchens with double-electric ovens and high-intensity gas ranges. Two spacious dressing rooms to make your models feel at home, including one just for kids with a whimsical garden mural and plenty of toys. And a treasure trove of apparel and accessories for children aged three months to eight years in our unique walk-in children's closet.

Our studio is all about accommodating your vision...where to shoot, what to shoot with, taking care of your models, and even helping you find the perfect clothing. That means your sets – and the people in them – are sure to result in photos you can be proud of.

STAFF

Good communication and problem-solving skills. Knowledge of state-of-the-art equipment and capabilities. Pushing the limits just a little farther...without the ego. And behind it all, a passion for excellence – and people.

Success depends, above all, upon people. Your success is the goal of everyone at Kalman and Pabst. You won't find that kind of dedication anywhere else in a group of people. And shooting the ideal picture comes not only through talented photographers, but also your enjoyment on the set – and off. Whether it's shooting hoops, hanging out at the bar or taking in a ballgame, you name your entertainment and we'll take you there.

DIGITAL

Guaranteed color, guaranteed printable files. Equipment from Leaf, Mamiya and Sinar Bron – brands that set industry benchmarks. Computer monitors calibrated to 5,000°K with a range of press-ready colors. Simple CMYK conversions and the most complex composites and effects, such as virtual locations and CGI images. Category 6 wiring that sends 1G of information up to our server in less than one minute.

Our digital technology isn't just about staying competitive or being cool. We want to give you the most optimal and creative environment for shooting photos. From high-resolution camera equipment to precise color management, our technology is here to work for you. And to make your working experience a pleasure. For example, you can

control the music from any workstation in our studio – or just plug your iPod into our network. We'll even keep your favorite tunes on file for you.

CLIENTS

The best clients...the best people.

Clients like you have brought us to where we are today. Without you, there would not be a Kalman and Pabst Photo Group. Your ideas, creativity and unique perspective have helped us become the quality studio we are.
